Chess Enrichment Program - Term 3

8-Week Curriculum Guide

Think. Play. Grow.

Beginner Level

Developing confidence: Strategy fundamentals and creative play

Week 1: Material Advantage

Component	Description
Learning Goals	• Understand material count • Win by accumulating pieces • Convert material advantage
Activities	• Material counting exercises • Trading when ahead drills • Winning with extra pieces
Superpower	Arithmetic - Counting and comparing

Week 2: Space & Mobility

Component	Description
Learning Goals	• Control more squares • Restrict opponent's pieces • Use space advantage
Activities	• Space control games • Cramping opponent exercises • Mobility comparison activities
Superpower	Expansion - Growing your territory

Week 3: Pawn Chains

Component	Description
Learning Goals	• Build strong pawn chains • Attack enemy pawn chains • Understand chain strength

Component	Description
Activities	• Chain building challenges • Chain-breaking exercises • Base of chain targeting
Superpower	Structure - Building solid foundations

Week 4: Open Files & Ranks

Component	Description
Learning Goals	• Recognize open lines • Control open files with rooks • Double rooks effectively
Activities	• Open file identification • Rook placement exercises • Doubling rooks drills
Superpower	Control - Dominating key areas

Week 5: Simple Combinations

Component	Description
Learning Goals	• Combine multiple tactics • Execute 2-3 move combinations • Find forcing sequences
Activities	• Combination puzzles • Creating your own combos • Combination spotting races
Superpower	Combination - Putting it together

Week 6: Weak Pawns

Component	Description
Learning Goals	• Identify weak pawns • Attack weak pawns • Avoid creating weaknesses
Activities	• Weak pawn targeting • Pawn structure maintenance • Weakness prevention drills

Component	Description
Superpower	Targeting - Finding vulnerabilities

Week 7: Time Trouble Practice

Component	Description
Learning Goals	• Play faster when needed • Make reasonable moves quickly • Avoid time pressure
Activities	• Speed chess sessions • Time management games • Quick decision drills
Superpower	Speed - Acting decisively

Week 8: Creative Chess Day

Component	Description
Learning Goals	• Express creativity through chess • Try unconventional ideas • Have fun with the game
Activities	• Chess variant games • Creative problem solving • Fun tournament and party
Superpower	Joy - Playing for fun

Intermediate Level

Strategic mastery: Plan formulation, endgame technique, and psychological play

Week 1: The Initiative

Component	Description
Learning Goals	• Seize and maintain initiative • Make threats continuously • Force opponent to react
Activities	• Initiative exercises • Creating threats • Counter-initiative challenges
Superpower	Momentum - Keeping pressure on

Week 2: Minority Attack

Component	Description
Learning Goals	• Execute minority attacks • Undermine pawn chains • Create passed pawns
Activities	• Minority attack patterns • Queenside play exercises • Pawn majority utilization
Superpower	Strategy - Long-term planning

Week 3: Bishop Pair Advantage

Component	Description
Learning Goals	• Utilize bishop pair effectively • Open the position for bishops • Trade appropriately
Activities	• Bishop pair exercises • Opening lines for bishops • Two bishops endgames
Superpower	Coordination - Using piece pairs

Week 4: Rook Endgames

Component	Description
Learning Goals	• Master Lucena position • Understand Philidor defense • Cut off enemy king
Activities	• Lucena technique • Philidor drawing methods • Rook endgame collection
Superpower	Endgame Precision - Technical skill

Week 5: Positional Sacrifices

Component	Description
Learning Goals	• Sacrifice for positional gains • Evaluate long-term compensation • Accept sacrifices correctly
Activities	• Positional sacrifice studies • Compensation evaluation • Accept or decline exercises
Superpower	Boldness - Taking calculated risks

Week 6: Playing Against Computers

Component	Description
Learning Goals	• Understand computer strengths • Find anti-computer strategies • Use engines for training
Activities	• Engine games and analysis • Finding computer weaknesses • Using analysis tools
Superpower	Adaptation - Learning from machines

Week 7: Chess Psychology

Component	Description
Learning Goals	• Manage emotions in games • Read opponent's state • Stay objective

Component	Description
Activities	• Emotional control exercises • Psychological resilience training • Tilt management discussions
Superpower	Mental Strength - Staying composed

Week 8: Team Championship

Component	Description
Learning Goals	• Compete as a team • Support teammates • Contribute to team success
Activities	• Team tournament • Collaborative analysis • Team celebration
Superpower	Unity - Achieving together

Advanced Level

Elite performance: Theoretical preparation, professional habits, and mastery

Week 1: Modern Opening Theory

Component	Description
Learning Goals	• Study latest theoretical developments • Understand current trends • Apply modern ideas
Activities	• Recent GM games analysis • Opening theory updates • Modern preparation methods
Superpower	Currency - Staying updated

Week 2: Piece Sacrifice Techniques

Component	Description
Learning Goals	• Execute piece sacrifices • Calculate sacrifice lines deeply • Assess sacrifice soundness
Activities	• Classic sacrifice patterns • Speculative sacrifices • Sacrifice calculation training
Superpower	Courage - Taking big risks

Week 3: Positional Pawn Sacrifices

Component	Description
Learning Goals	• Sacrifice pawns for position • Understand typical pawn sacs • Generate compensation
Activities	• Positional pawn sacrifice themes • Greek gift variations • Creating attacking chances
Superpower	Investment - Giving to gain

Week 4: Endgame Studies

Component	Description
Learning Goals	• Solve artistic endgame studies • Appreciate endgame beauty • Find only moves
Activities	• Classical study collection • Study composition • Finding brilliant moves
Superpower	Artistry - Appreciating beauty

Week 5: Candidate Master Techniques

Component	Description
Learning Goals	• Play at CM/FM level • Maintain consistent performance • Minimize errors
Activities	• Error reduction training • Consistency challenges • High-level game practice
Superpower	Consistency - Reliable performance

Week 6: Specialized Openings

Component	Description
Learning Goals	• Master specialized systems • Prepare surprise weapons • Build complete repertoire
Activities	• Rare opening exploration • Surprise preparation • Complete repertoire review
Superpower	Specialization - Deep expertise

Week 7: Grandmaster Games

Component	Description
Learning Goals	• Study world-class games • Extract high-level concepts • Model GM thinking

Component	Description
Activities	• Annotated GM game study • Guess the move exercises • GM style emulation
Superpower	Modeling Excellence - Learning from the best

Week 8: Mastery Exhibition

Component	Description
Learning Goals	• Demonstrate mastery • Give simultaneous exhibition • Inspire others
Activities	• Simul display • Teaching demonstrations • Mastery celebration
Superpower	Legacy - Inspiring the next generation
